

# got guts?

We are looking for motivated PhD students and/or Postdocs to study circadian rhythms in inflammation and cancer. Our lab uses the mouse system, organoid culture, and genetics to study the daily timing of stem cell pathways in the small intestine and colon. For more info see: <http://www.karpowiczlab.ca>  
[@KarpowiczLab](#).

If you are interested in our work and wish to join — please send your CV and a short statement explaining your interest by email to [pkarp@uwindSOR.ca](mailto:pkarp@uwindSOR.ca)
